CAREER OBJECTIVES

Seeking a challenging position where my strong academic background and passion for learning can be utilized to contribute to cutting-edge research and academic advancements. Eager to leverage further education to enhance contributions within the academic community.

EDUCATION

M.Sc. in Computer Science & Engineering

Bangladesh University of Engineering & Technology (BUET)

2024 - Present

CGPA: **3.57** out of 4.00 (10-Point Absolute Grading Scale; 90% = A+)

B.Sc. in Computer Science & Engineering

Khulna University of Engineering & Technology (KUET)

2019 - 2024

CGPA: **3.73** out of 4.00

Higher Secondary Certificate (HSC)

Dr. Mahbubur Rahman Mollah College, Dhaka.

2016 - 2018

GPA: **5.00** out of 5.00

Secondary School Certificate (SSC)

Narayanganj High School and College, Narayanganj.

2011 - 2016

GPA: **4.89** out of 5.00

PROFESSIONAL EXPERIENCE

Lecturer, Bangladesh University of Engineering and Technology (BUBT)

July 2025 - Present

Lecturer, Hamdard University Bangladesh (HUB)

May, 2024 - July, 2025

Delivered engaging lectures and hands-on lab sessions for core CSE courses, including Digital Logic Design, Computer Architecture, Microprocessor and Microcontroller, and Discrete Mathematics, accommodating diverse learning styles. Monitored student performance, offering personalised feedback and facilitating learning through quizzes. Mentor students on academic progress, research projects, and career development.

PUBLICATIONS

Conference:

"Unravel News: An Efficient Summarization Approach.", Published in the proceedings of IEEE COMPAS 2024

Authors: **Ankan Saha**, Abdullah Al Shafi

Conference:

"Enhancing Hyperledger Fabric: A Scalable Framework for Optimized Blockchain Performance." Published in the proceedings of IEEE Conference ICCIT 2024

Authors: **Ankan Saha**, Sourav Majumder, Md. Motaleb Hossen Manik, and M.M.A. Hashem

Conference:

"Blockchain-Driven Identity Management for IoT: Enhancing Security and Scalability with Multi-Factor Authentication." Published in the proceedings of the IEEE Conference QPAIN 2025

Authors: **Ankan Saha**, Md Rashadul Haque Shuvo, Sourav Majumder, Fahima Hossain

Conference:

"TruthShield: A Machine Learning Approach to Fake News Detection." Published in the proceedings of the IEEE Conference QPAIN 2025

Authors: Palash Saha, Fahima Hossain, Rashadul Haque Shuvo, Niaz Hossain, Md Asif, **Ankan Saha**

Conference:

"Segmentation-Driven Deep Learning for Explainable and Automated Vocal Fold Disorder Classification." Published in the proceedings of the IEEE Conference ICECTE 2026

Authors: Fahima Hossain, Ananna Datta, **Ankan Saha**

ACADEMIC ACHIEVEMENTS

Dean's Award

Dean's award from The Honourable Dean of the Faculty of Electrical and Electronic Engineering (EEE), KUET, for excellent results.

2021

Dean's Award

Dean's award from The Honourable Dean of the Faculty of Electrical and Electronic Engineering (EEE), KUET, for excellent results.

2020 **1st Runner up**

Inter School Math Olympiad, held in the Narayanganj Ideal School

2015

THESIS WORK

Optimizing Hyperledger Framework for High Transactions Throughput in Private Blockchain [↗](#)

Developed an innovative approach to optimize transaction throughput in Hyperledger private blockchain networks, achieving significant improvements in speed and efficiency through enhanced network architecture, advanced chaincode functionality, and seamless Node.js integration.

MAJOR PROJECTS

Nail Disease Prediction [↗](#)

Technologies: Python, Pytorch, Transfer Learning

A deep learning-based system for detecting nail diseases from images. The system uses Transfer Learning to classify various nail conditions and diseases, providing automated medical diagnosis assistance.

Bangla-Banglish Sentiment Analysis [↗](#)

Technologies: Python, Scikit-learn, NLTK, BERT

Developed a hybrid approach combining BanglaBERT and BanglishBERT for multiclass emotion classification in Bangla and Banglish texts.

News Summary [↗](#)

Technologies: Python, Flask, HTML, Bootstrap

A web application that summarizes news articles from various sources using extractive and abstractive summarization techniques. The NLP transformer T5 model works in the backend.

Medi-Sol [↗](#)

Technologies: HTML, CSS, JavaScript, Bootstrap

A web platform that provides users with easy access to nearby medical facilities, ambulance services, pharmacies, and doctor contact information.

Basketball-Ground [↗](#)

Technologies: C/C++, OpenGL 3.3

An OpenGL-based simple game where one player can simulate basketball gameplay in the virtual world.

Len-Choa [↗](#)

Technologies: Python, Pygame

Game theory-based AI is used for developing this game. Interactive graphical interface using Pygame, which gives challenging and entertaining gameplay.

[Cardiac Recorder](#)

Technologies: Java, SQL Lite, Git, Unit & UI test

Android application to keep track of the health information of the user. Unit testing and UI testing were used here to validate the application's correctness.

[Coaching Management System](#)

Technologies: Java, JavaFX, SQL, OpenWeatherMap API

A coaching management application that is based on database and API manipulation.

[Cook-Book](#)

Technologies: Swift, MySQL

An iOS application that stores the recipes of different dishes. Users can insert new recipes into it and also delete existing recipes from the list.

[Line Follower Robot](#)

Technologies: C/C++, Arduino

Built and programmed a 3-wheeler robot that autonomously follows lines and successfully navigates complex node intersections.

[Compiler Project](#)

Technologies: Flex, Bison, Objective C

Built and designed own compiler (Only Lexical and Semantic Analysis).

CERTIFICATION ACQUIRED

[Attention in Transformers: Concepts and Code in PyTorch](#)

Skill Gained: Deep Learning, Embeddings, GenAI Applications, Machine Learning, NLP, Transformers

[Number Theory and Cryptography](#)

Skill Gained: Number Theory, Cryptography, Modular Exponentiation

[Supervised Machine Learning: Regression and Classification](#)

Skill Gained: Linear Regression, Regularization to Avoid Overfitting, Logistic Regression for Classification, Gradient Descent, Supervised Learning

[Advanced Learning Algorithms](#)

Skill Gained: Tensorflow, Advice for Model Development, Artificial Neural Network, Xgboost, Tree Ensembles

[Blockchain Basics](#)

Skill Gained: Ethereum, Cryptography, Blockchains, Bitcoin

[Build an App in Android Studio using Read-Write](#)

Skill Gained: Android Studio, Android Development, Java Programming, Mobile Application Development

LANGUAGE PROFICIENCY

Proficient in **Bangla** and **English**

TECHNICAL SKILLS

Programming Languages:	C/C++, Python, Java, Swift
Data Analysis and Visualization:	Numpy, Pandas, Matplotlib
Database:	Oracle SQL, MySQL
Framework and SDK:	iOS, Android, Bootstrap, Flask, OpenGL, Hyperledger Fabric
Web Programming:	HTML, CSS, JavaScript, PHP
Operating System:	Linux, MacOS, Windows
Others:	GIT, LaTeX, Word, PPT

COMPETITIVE PROGRAMMING

- [Codeforces](#) Solved 500+ problems
- [Leetcode](#) Solved 300+ problems
- [Codechef](#) (3 star with maximum rating 1612)
